

Effortless monitoring and optimisation of progress

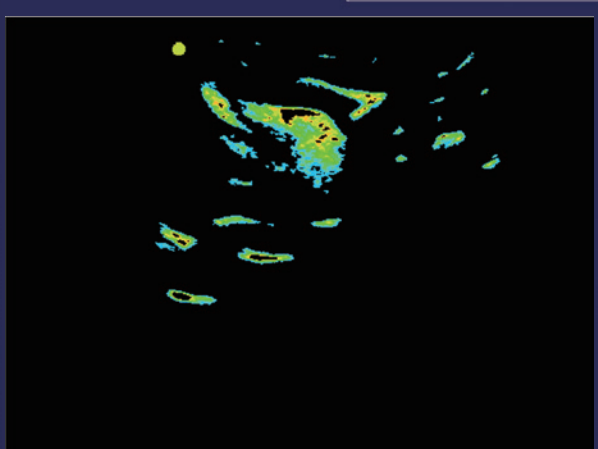

Particle Image Analysis Software

DIPP-Macro II

DIPP-Macro II is a specialised tool used to analyse and track particles or objects in digital images or videos. The software allows you to easily filter and sort your data based on a variety of parameters.

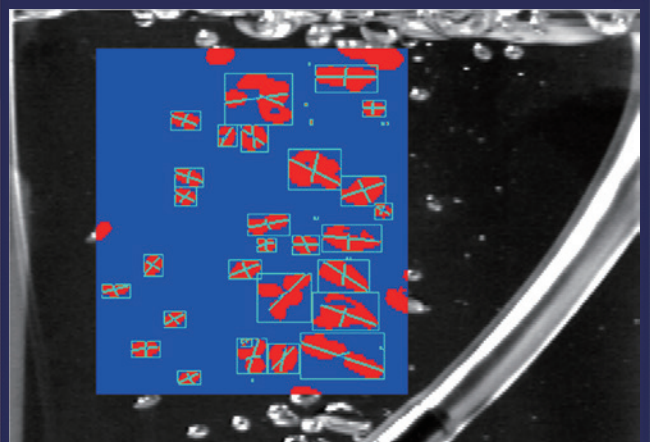

DIPP-Macro II can optimize your experiment, providing a more in-depth analysis of your samples and a better understanding of your data.

Particles detection

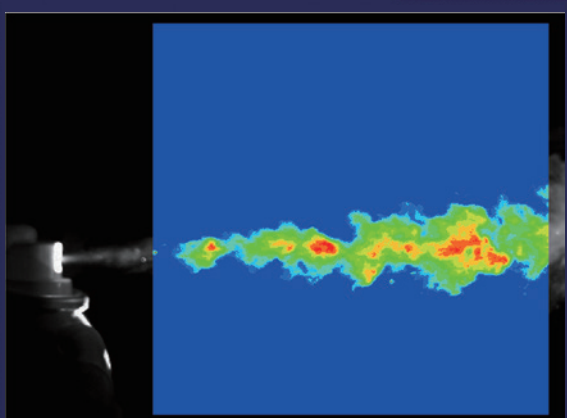

Pseudo colour grayscale

Quantity count, size measurement

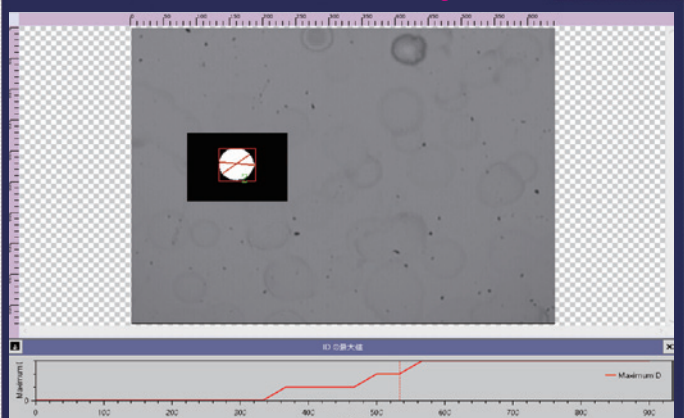

Binarization and Labelling

Particles visualisation

Enhancement processing + Pseudo colour

Count and time series analysis

Automated measurement and Graphing
